

Geography

The terrorists are planning an attack on one of the nation's secure facilities. We need to stop the attack. Our field agents have reported that the terrorists have activated several sleeper cells. We are sending you what information we have now. Your task will be to Locate where the attack will take place.

As soon as you are certain you have accurate information for the DDD you can send that information by using the following web form:

DDD

Make sure your answers are correct as the form can only be completed one time.

Maze

Agent Berry sent a maze. It should be in your folder. Earlier he sent an overlay with numbers. We've combined the two. Note that it is a cross over maze, so you follow the paths over and under the other paths.

We believe the correct path through the maze will reveal a code that will allow you to access more information from the agent's secure website. To help you get started, we know the first two numbers are 03.

Agent Berry

Social Media Pictures

One of our agents sent us a document with pictures of some known terrorists. We need to identify these people and figure out where they are located. We are certain that the ones we are looking for are in these pictures. We think these pictures will help you to locate where the attack will happen or at least identify locations that the terrorists are operating in. They will likely be in the same area so, if you find several near the same location, Send us the location you think they are working in. Here is a link to the document.

Location Images

Send the answer to this link.

Location

We have given you a folder with lists of secure locations around the country. These are the locations they hacked. One of them will be their target. We just need to find out which one it is.
