

# Science

The terrorists are planning an attack on one of the nation's secure facilities. We need to stop the attack. Our field agents have reported that they are building something. Your job will be to find out what they plan to use in their attack. This packet contains all that we know so far.

As soon as you are certain you have accurate information for the DDD you can send that information by using the following web form:

Make sure your answers are correct as the form can only be completed one time.

Science has several puzzles that need to be solved. You should look through this document fully, so you know what they are. Gathering more information may help with solving the last two. Some of the other groups may help you find the information you need.

## Weapon Note

Agent Jones sent this in, we think it is a list of possible weapons and may be connected to some other information that will help us figure out what they intend to use.

## Munitions List

In a separate document, you will find the Munitions list of controlled weapons. Use the list to help define what weapon the terrorists are building. We need to know what we are up against, so we can be prepared. Agent Jones' list helped us to narrow it down a bit, but it is still pretty broad. We might be able to track down the terrorist by looking at components of some of the devices. See if you can get Police some components that they can check against purchases.

## Card Message

We intercepted this message from the terrorists. We think it is some kind of code. It appears that the cards are spelling out words. We just need a way to break the code to find the message.
