Police

The terrorists are planning an attack on one of the nation's secure facilities. We need to stop the attack. Our field agents have reported that the terrorists have activated several sleeper cells. We are sending you what information we have now. We need you to try and identify which terrorist organization is planning the attack and as much information as you can on what weapons they have.

As soon as you are certain you have accurate information for the DDD you can send that information by using the following web form:

DDD

Make sure your answers are correct as the form can only be completed one time.

One of our agents recorded an audio file at the gun range where the terrorists train. Compare it to the DDD gun database by following the link below. See if you can determine what weapons they plan to use when they attack.

DDD Gun Database

The audio file of the gun range is in your package.

There is a link at the bottom of the page that will take you to a response form. Once you've picked out what four guns the terrorists are likely to be using, our system will be able to get you the password to agent Jenkin's secure website.

Agent Jenkins

Mug Shots

In your packet you should also have a document that has mug shots of our known terrorists. You should use this when you can to help us narrow down who we are dealing with.

We received the following description from one of our field agents. This may help to narrow down your search for the terrorists.

> "I encountered the person who I believe is the leader of a very dangerous terrorist group. She wasn't at all what I expected. She is young. I'd say late twenties or early thirties, attractive with blond hair. I didn't get close enough to catch her eye color, but I think it is grey or brown and not blue."

Purchase List

You also have a purchase list. This list contains information about recent purchases from people on our terrorist watch list. This may also help you to find out what they are trying to use in their attack. See if the guys over in Science can help you with what you should be looking for. They are working on trying to figure out what the terrorists are building.
